Compact Disc Player Piano System

Features & Benefits

Factory Installation: Insures precise, high quality installation customized for each Wyman Grand Piano model.

Large CD Library: Will read and play QRS™, *PianoDisc™, and WebOnlyPiano™ libraries.
This will satisfy every musical taste.

Remote Controller: Easy to use IR remote with large buttons and easy to read graphics.

Small CD Player Profile: Almost invisible, non-obtrusive unit does not take away from the beauty of the piano.

Musical Expression: Captures all the musical expressions of the original performing artist; vocalist; orchestra; and band.

Directional Speaker: 100 watt RMS speaker directs sound out and away from the piano, rather than straight down.

Sustain Pedal Movement: Sustain pedal moves up and down as if the piano is being played “live.”

Line Input: Left and right input can be used to connect external audio sources to the player unit (MP3 or I-Pod).

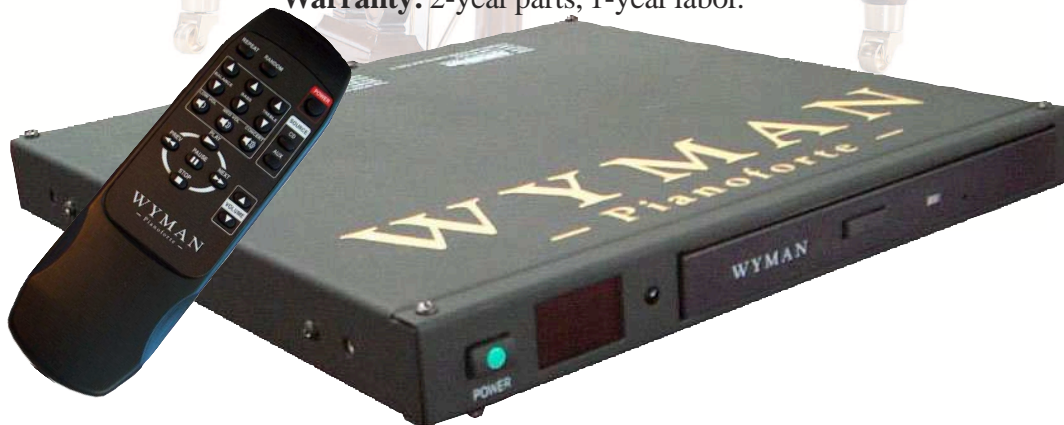

Auto Play: Insert a CD and the Wyman Player will automatically play.

Preset Master Volume Control: Allows for convenient instant global volume changes.

Random Shuffle Play: Will randomly select and play selections from the CD.

Factory Calibration: State-of-the-art factory calibration assures the Wyman Player System will play a wide range of dynamic expressions, including the ability to play very softly.

Warranty: 2-year parts, 1-year labor.

In an effort to bring the best CD Player System to market, Wyman reserves the right to change specifications without notice.

*PianoDisc™ non-encrypted CD's only.
